

Creating a Sprite for your Story

How to draw my own sprite?

1. Open Scratch
2. Select the **Paint New Sprite** tool

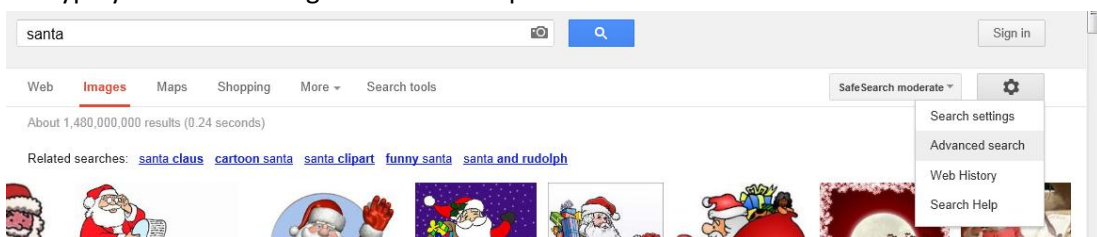

3. Use the painting tools to create your object or character

How to create a Sprite using an image from the internet?

1. Open your internet browser and visit Google Images at <http://www.google.co.uk/imghp>
2. Type the name of the object or character you are searching for e.g. Santa. Click Search.
3. Use the **Advanced Image Search** (found under preferences in Internet Explorer) and set the file type you are searching for to **GIF**. Complete an advanced search once this is done.

4. Find an image you like and click on it. Now right click the image and select **Save Picture As**.
5. Save this image to your Personal Drive in your Literacy from Scratch folder.
6. Now open Scratch and select the **Choose New Sprite from File** option.

7. Find your image from your Literacy from Scratch folder. Select it and click **Ok**
8. The image should now appear in the Sprite Library area and can be dragged onto your stage
